## DATA ANALYST

+91-8767735611 yashsonwane438@gmail.com Pune, Maharashtra.

### SUMMARY

Data-Driven Problem Solver and Business Intelligence Specialist committed to transforming complex data into clear, actionable insights. Expert in the full analytics lifecycle, from data cleaning and extraction using SQL and Python to final visualization and reporting. Proficient in BI tools, including Microsoft Power BI, and recognized for strong logical thinking and the ability to execute projects efficiently. My focus is always on delivering optimized, user-centric data solutions, such as the successful Pizza Sales Data Analysis Dashboard, which identified key business trends and improved sales visibility.

### EXPERIENCE

Java Developer Intern

#### Info Origin Inc

June 2023 - July 2023 Gondia, IN

- Collaborated with team members to complete Java programming assignments efficiently.
- Engaged in problem-solving to tackle complex programming tasks.
- Gained hands-on experience in software development practices at Info Origin Inc.

### EDUCATION

#### Bachelor of Technology Computer Engineering

G. H. Raisoni College of Engineering Pune, India

2024 - 2027 Pune, IN

#### Diploma Computer Engineering

Government Polytechnic Gondia

2021 - 2024 Gondia, IN Percentage: 80.40%

#### Secondary (X), Maharashtra State Board

#### J.M.High School Civil Lines

2021 Gondia, IN Percentage: 77.00%

### CERTIFICATION

#### • Effective Writing (Communication Skills) - NPTEL

##### NPTEL

Developed effective writing skills and communication

#### • HackerRank SQL Basic Certification

Mastered SQL query development by solving numerous real-world problems on HackerRank.

### KEY ACHIEVEMENTS

#### • HackerRank SQL Basic Certification

Achieved 3-star rating in HackerRank SQL skill assessment, demonstrating strong problem-solving capabilities in real-world SQL query challenges.

### LANGUAGES

#### Hindi

## PROJECTS

---

### Pizza Sales Data Analysis Dashboard (SQL + Power BI Project)

Nov 2025

- **Goal:** Analyzed pizza sales data using SQL and visualized insights in a Power BI dashboard to improve business performance and optimize the menu strategy. \* Key Responsibilities:
  - Calculated essential Key Performance Indicators (KPIs) including Total Revenue, Average Order Value, Total Pizzas Sold, Total Orders, and Average Pizzas per Order.
  - Used SQL for data extraction, aggregation, KPI calculation, sales percentage analysis, and identifying top/bottom performers.
  - Built an interactive Power BI dashboard with slicers, line, bar, and pie charts to visualize daily/monthly order trends and sales distribution by pizza category and size.
  - **Key Outcomes:** Identified high-performing items (e.g., Thai Chicken Pizza), discovered peak order times (Friday & Saturday evenings), and noted peak sales months (July & January), providing clear, actionable business insights.
  - **Tech Stack:** SQL, Power BI, Data Visualization, DAX, Data Analysis.
